Walhachin (274m)	24.5 °C	36.7 °C	0.1 mm	-

Note: many stations of Environment Canada measure an amount of 0,5 mm of rain or melted snow even in sky clear conditions. EC is aware of the problem but is unable to give any information if and when this problem might get fixed. So if you see an amount of precip of 0,5 mm at Lytton, Clinton or Quesnel, it might be a fake amount which is not in the responsibility of The Weatherman Inc.
